

Belle Elements

THE COLLECTION

Concept

Belle Elements is an elegant and refined design collection with special attention to detail and a true search for the perfect materials.

Together with Belle Design, we worked on feminine forms with the idea of lightness but with the ability to answer to all specific technical needs.

Belle Elements: where style transcends stereotypes.

Materials

We worked in collaboration with Belle Design, which took care of the choice of materials and the art direction.

Galvanized steel, which brings a very interesting rhythm to the materials; stainless steel, a technical material that can withstand the chemical attacks of products and can be worked into curved forms; marble and leather for the most noble areas.
